Customer testimony Starbucks Philippines

After careful evaluation of several global retail solution offerings, Rustan Coffee selected LS Retail because of its natural and obvious advantage to any Microsoft Dynamics NAV user plus of course its robust features, reliable infrastructure, and other functionality enablement" says Riz Oades, VP for Finance and IT at Rustan Coffee.

With LS Retail integrating all Starbucks stores to a single server, Rustan Coffee will now be able to manage its entire operations using Microsoft Dynamics NAV. "Using LS Retail, Rustan Coffee expects to significantly enhance service efficiency with zero operational downtime, faster data exchange and seamless interoperability. LS Retail will likewise enable Rustan Coffee to implement a powerful in-store, on-line inventory management capability", according to Riz Oades.
